Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization

Computer Vision Basics

Neural Networks and Deep Learning

Data Visualization with Python

Hassan Murtaza

GenAI | Agentic AI | RAG & LLMs | MD @Divine Pathways Services
Islāmābād, Pakistan

Summary

I am an AI/ML Engineer with over 3 years of industry experience, specializing in Retrieval Augmented Generation (RAG), Applied ML, Human-in-the-Loop AI, and MLOps. I have developed state-of-the-art models, optimized ML pipelines, and mastered model deployments to drive real-world results. My expertise extends to preparing high-quality datasets for diverse use cases, ensuring their effectiveness and impact remains consistently high.

I excel at building high-impact AI solutions that are efficient, scalable, and aligned with business objectives. My recent work includes RAG-based chatbot applications, tailored for industries like travel, insurance, finance, and taxation. These chatbots empower travel companies by providing users with instant, personalized responses, while insurance companies leverage them to manage claims more effectively. In finance and taxation, these AI tools facilitate real-time assistance, helping users navigate complex processes with ease.

With a strong blend of technical skills and strategic vision, I am an ideal fit for AI leadership roles. I have led teams, driven R&D efforts, and streamlined ML workflows to deliver cutting-edge solutions. I thrive on transforming innovative ideas into impactful, scalable AI applications.

Experience

Divine Pathways Services LTD
MD

July 2025 - Present (1 year)

London Area, United Kingdom

As Managing Director, I lead a business that delivers IT and software solutions for the travel and transport industry, helping organizations streamline operations and scale with confidence. Alongside our technology focus, we specialize in preparing Umrah pilgrimage journeys for travelers worldwide,

ensuring a peaceful, well-guided experience in the sacred cities of Makkah and Madinah.

Our work spans end-to-end travel preparation, including flights, hotels, transportation, visa assistance, and complete journey guidance, with packages thoughtfully tailored to individual needs. I am committed to building trusted systems—both digital and operational—that support meaningful journeys and sustainable growth in the travel and transport market.

SoftEase Technologies Pvt Ltd.

AI/ML(LLM) Engineer

November 2023 - Present (2 years 8 months)

Paris, Île-de-France, France

I coordinate team, managed timelines, and ensured effective communication with stakeholders while driving innovation and addressing technical challenges. Additionally, I ensured that the AI models, and LLM Agents aligned with business goals and complied with ethical standards.

CodeDevza Technologies

AI/ML Engineer

August 2022 - September 2023 (1 year 2 months)

Islāmābād, Pakistan

Knowledge Discovery and Data Science

Research Assistant

December 2021 - July 2022 (8 months)

Islāmābād, Pakistan

- 1-Conduct comprehensive reviews of existing literature and research to understand the current state of knowledge in the Bigdata Tools and Technologies
- 2-Collect data using programming approach such as scraping, monitoring etc
- 3-Process collected data, and draw necessary analysis such as statistical analysis, predictive analysis, data fragmentations, according to the problem statement.
- 4-Build data pipelines using big data tools (Kafka, pySpark, Hadoop).
- 5-Dig into the world of research papers and develop robust, reliable solution for the sake of product development.
- 6-Creat visual representations of data, such as graphs and charts, to facilitate understanding and presentation of results
- 7-Communicate analysis, findings, and results within formal presentations

Education

National University of Computer and Emerging Sciences

BS, Computer Science · (2017 - 2021)

Superior College

FSc, Pre-Engineering · (2015 - 2017)

Nusrat Jahan Academy School

SSC/ Matriculation, Science Group · (2013 - 2015)
